

## Reading Becomes Storytelling...

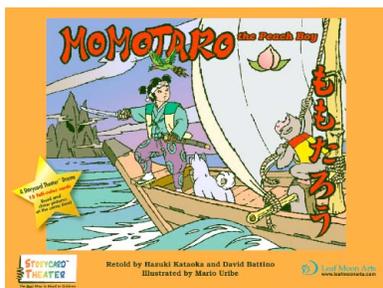

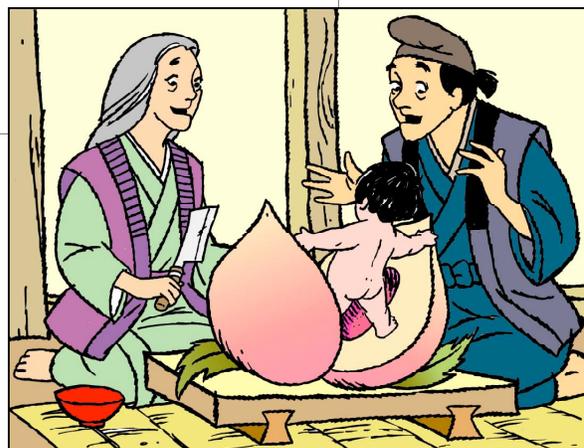

**B**ased on traditional Japanese picture-card stories called *kamishibai* (paper theater), Storycard Theater dramas allow you to read to a group of children *while showing them the pictures*. No longer do you have to twist away from your audience to read a book! Reading becomes storytelling. It's easy and fun.

Storycard Theater dramas are printed on 12 sturdy, 10x13-inch cards. They're small enough to hold comfortably, yet large enough to showcase the colorful artwork. The back of each card features clear, kid-tested text and a smaller version of the image the audience is seeing.

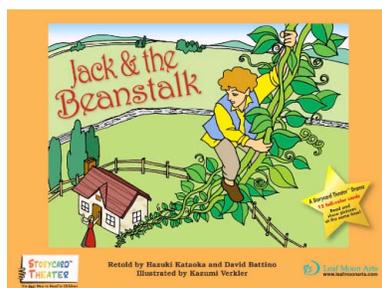

We base our stories on multicultural folktales, chosen to demonstrate positive themes such as love, kindness, and honesty. They're ideal for **libraries, classrooms, birthday parties, daycare,** and students **learning English**. Many children enjoy performing them for each other, or inventing their own stories based on the art.

With kamishibai, the text faces *you* while the art faces your audience. Conventional picture books force you to talk over your shoulder.
